MARKET TRENDS

“ Learning a foreign language is not just an educational pursuit; it's an investment in one's future. Studies show that multilingual individuals tend to develop stronger cognitive skills, greater empathy, and better problem-solving abilities. In an age where AI can translate words but not context, human fluency still wins. ”

-The Times of India

“ Over the past decade, India has become a favoured destination for hiring skilled workers, experiencing an annual growth rate ranging from 15-20 per cent, largely due to the ageing population in developed nations. Going forward, this trend of global mobility of Indian workforce is expected to witness 28-30 per cent growth in the next five years. ”

-The Economic Times

“ The market for language services in India (translation, interpretation, localisation) is expected to grow strongly — a report forecasts growth of ~USD 7.55 billion from 2023-2028 at a CAGR of ~14.37%. ”

-India Today

“ Language skills are increasingly seen as value-add rather than just a hobby — they help with study-abroad plans, multinational work, global mobility. ”

-The Print
